PROFILE

I have three years of development experience as a backend engineer and system analyst, with a strong coding background and excellent problem-solving skills. I enjoy collaborating with others to effectively tackle challenges, and I am passionate about learning and exploring new technologies to enhance my expertise.

HIGHLIGHTS

- I have 3+ years of experience in **Java** development, focusing on robust backend systems using **Spring Boot** and designing and implementing **RESTful APIs**.
- I have 2 years of hands-on experience with **Vue.js** for front-end development, building single-page applications.
- I have 2 years of experience designing and managing comprehensive database schemas using **MySQL**.
- I have 1 year of practical experience in an **Agile** environment, collaborating with cross-functional teams to deliver projects on time.
- I have 1+ year of experience as a **System Analyst**, effectively managing multiple tasks simultaneously through strong multitasking and time management skills.
- I have a strong ability to adapt and innovate in fast-paced environments. I have developed side projects using **Flutter** and **React Native**, which are available on my GitHub(github.com/ct2eng).
